It has the touch, feel and prize probabilities of Video Poker, but **It's BINGO!** Why's this such a great deal ... PokerNanza,<sup>®</sup> Video King's latest patented game, puts a whole new spin on Video Poker.

## Progressive Jackpots!

It's a "virtual" jackpot, in terms of gaming. Fact, PokerNanza will probably be the largest jackpot offered in the facility. A multi-player game, PokerNanza features 3 or more progressive prizes, which have variable hit frequencies – weekly, monthly, quarterly and annually – depending on the volume of game play.

And, if you play your cards right, these progressives can generate much – 100 times or more – larger payouts than traditional video poker progressives. PokerNanza will offer everyone's favorites, from "Jacks Or Better" to "Deuces Wild," typically played in Vegas.

## A Great Deal ...

We bet you'll love this game, playable on the CHAMP-e,<sup>™</sup> Video King's new Android tablet, designed with more processing power for more complex games and patterns.
