El Dorado PL™

Hands-Free Bingo Console

The El Dorado PL,™ a name that evokes tales of legendary riches, may be the best “pick” of any hands-free Bingo console around ... Just ask any Bingo operator, worth his weight in gold. An alternative to the Corona Integra II,™ The El Dorado PL – a two-piece unit – offers the same integrity of a hands-free system, but a more compact, high-speed console – all at a reduced price. Much like the precious metal, this ultra-modern console, designed with a plexiglass-encased ball chamber, would be a valuable asset to any Bingo venue.

• Key Assets •

- State-of-art design gives players high visibility of Bingo balls.
- Larger base and height offers better view, no matter where it's placed.
- Innovative, static prevention system, to enhance speed and reliability, ensures fast ball calls and fast ball returns.
- Artificial neural network, latest technology for ball recognition system, ensures called balls are never touched.
- Optical character recognition displays simulated and live ball image.
- Two separate units, an independent ball chamber and caller console.
- Ball chamber can be mounted stationery or on wheels to facilitate storage.
- Remote caller console can be located adjacent to ball chamber or another location within the hall.
- Caller console communicates with the ball chamber via standard Ethernet. No practical limit to distance between the two, as long as the appropriate network wiring is in place.
- Multi-color ball chamber LEDs can display up to 16 different colors.
- Designed with inner and outer chamber, greatly improving noise reduction.
- Air-assisted ball return minimizes time between games.
- Ball removal door facilitates quick inspection and cleaning.
- Integrates with Video King's PowerPlay™ software, other gaming components, including the TriplePlay™ Bingo Display and more traditional flashboards.

Speed • Dimensions

- First ball call from blower startup: 10-20 seconds
- First ball call from a previous game close: 10-20 seconds
- Fastest sustainable ball call rate: 1 second
- Ball Chamber: 31" W x 32" L X 62" H: 300 pounds
- Caller Stand: 32" W x 46" L X 31.5" H: 300 pounds
