The El Dorado PL™ – touting the latest technology – may be the best prospect in terms of game integrity, workmanship and design, featuring a more compact, higher-speed, hands-free console.

The two-piece unit, with ultra-modern design, consists of a Plexiglas-encased ball chamber and separate console for the bingo caller to operate, which can be placed adjacent to the ball chamber or another location within the hall.

Integrating fully with other gaming components, its key features include an innovative static prevention system, to enhance speed and reliability, the latest in ball recognition technology, as well as inner and outer chamber, greatly improving noise reduction.

A veritable show piece, the El Dorado – with its 16-color programmable LED display – large base and improved height, gives players high visibility of the bingo balls, no matter where it is placed in the hall.

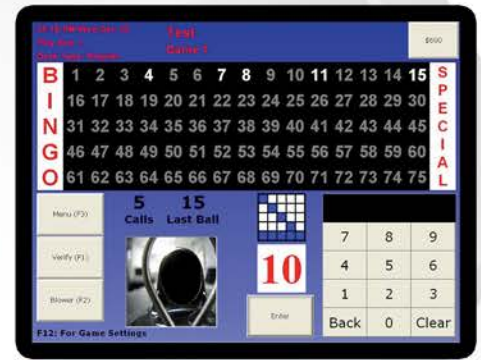

Standard Features

- 15-inch, touch-screen monitor with built-in speakers
